Wastewater control summary

DEMO - Cap Bon Food Processing

Effluent treatment and cold-chain modernization

Sector	Food processing
Location	Nabeul, Tunisia
Financing request	3,100,000 TND
Workforce	165 employees

Scenario context

Fruit and vegetable processing with HACCP procedures, wastewater treatment, organic-waste recovery and refrigeration maintenance.

Evidence and verification status

The controlled scenario provides for dedicated monitoring records, maintenance responsibilities, appropriate treatment or containment, and traceable waste disposal. No laboratory report or real monitoring certificate is fabricated.

Presentation purpose

Sector-relevant food safety evidence, water controls and resource efficiency support a balanced assessment.

This document is an illustrative software demonstration note. It is not a certificate, regulatory approval, audit opinion or document from a real company.
