Energy transition summary

DEMO - GreenRoute Logistics

Fleet renewal and depot efficiency

Sector	Transport
Location	Sfax, Tunisia
Financing request	4,600,000 TND
Workforce	130 employees

Scenario context

Freight fleet renewal, driver training and fuel telemetry. Diesel exhaust and used-oil handling remain material even with strong controls.

Evidence and verification status

Total annual energy: 8,900,000 kWh; fuel: 7,900,000; natural gas: 0; renewables: 180,000; other: 0. Grid electricity is the remaining balance. Planned transition investment: 750,000 TND. Transition commitment: YES. Targets are not verified savings.

Presentation purpose

Calculated transport case with realistic combustion and maintenance waste exposure; emissions exposure remains despite good controls.
