Community engagement summary

DEMO - Medina Civil Infrastructure

Bridge and drainage corridor construction

Sector	Building / construction
Location	Kairouan, Tunisia
Financing request	12,500,000 TND
Workforce	220 employees

Scenario context

Major bridge and drainage works near residential communities. Consultation and compensation plans exist, but management monitoring and certification coverage need strengthening.

Evidence and verification status

The scenario provides for a community liaison contact, stakeholder consultations, construction traffic controls, a grievance register and periodic follow-up. These declarations require review in a real assessment.

Presentation purpose

Category A with mitigated community and resettlement impacts; the remaining governance gaps warrant follow-up.
